## HOW DEEP IS THE MOON?

**CHET ZDROWSKI**

*June 25, 2017*

*1 p.m. - 4 p.m.*

The Moon can be called the deepest symbol in astrology. Lunar symbolism has many layers, from the feelings of the present moment, all the way to our deepest memories and conditioning. Our level of happiness, our reactions, how we care for ourselves and others, how we adapt to life are all intertwined with the natal Moon.

The rhythms of our unfolding inner life are reflected in the Progressed Moon cycles while many of the rhythms of our material life are reflected in the Part of Fortune and Part of Spirit. Links to our deepest past are reflected in the New Moon before birth and the nodes of the Moon. The Moon is truly very, very deep.

In this talk we'll explore the Moon's phases, the Progressed Moon cycle, the New Moon before birth, the Part of Fortune and Spirit, and the lunar nodes. Example charts will be used to demonstrate how to apply these techniques in readings.

*Chet Zdrowski has been a student and practitioner of astrology since 1977. He studied for several years with the late Richard Idemon, and is deeply influenced by the work of Dane Rudhyar and Robert Hand. Since 2005 he has studied with Steven Forrest in his Evolutionary Astrology Apprenticeship program. Psychology, meditation, perennial philosophy and music are also lifelong passions. Chet's approach is grounded in the real-world experiences of parenting, marriage, business and the work world. His greatest pleasure is to alert people to their unique gifts, to inspire them to move forward on their unique individual path, and to help them move through the patterns that limit them and cause unhappiness. Chet is also the founder and leader of the "Transpersonal Astrology Group" that meets in Fair Oaks CA. You can reach Chet at [www.czastronomy.com](http://www.czastronomy.com)*
