## **Planets in Aspect to the Nodal Axis: The Portal of Evolution**

The Nodal Axis reflects in our chart a central axis of evolution. When a New Moon or a Full Moon occurs on the Nodes, there is an eclipse which dramatically intensifies evolutionary processes. The same goes for other planets in direct aspect to the Nodes – they dramatically shift and direct the course of our lives. Maurice will discuss the effect of each planet with the Nodes. This study is essential for understanding your own chart and those of your clients
