GEMINI BRETT

WHAT IN THE HEAVENS IS THE ZODIAC?

Many astronomers say astrology is nonsense because the tropical Signs do not align to the constellations as they did in Hellenistic times. Astrologers often respond by claiming the tropical archetypes are about seasonal energies, not about constellations, but if this is so we should flip the Signs for the southern hemisphere and we don't. If the Tropical Zodiac is not of the Stars and not of the Seasons, then just what in the Heaven's is it? In this ground-fixing presentation, Gemini Brett solves this riddle by presenting the Directional Zodiac. You will leave this talk with knowledge that will not only assist you in defending the Tropical Zodiac from astronomer's attacks, but will empower you with the knowledge of the beautiful astronomical concepts it seems they have chosen to forget. Most importantly, a deeper connection to the sacred astronomy of astrology will expand your archetypal awareness, deepen your delineations, and offer an antenna that will allow you to receive direct transmissions from the ancient wisdom traditions.

"Wow, just wow! Gemini is a powerful speaker, storyteller, weaver of myths, legends, lore, and science. His talk was spellbinding and really made me understand and feel my connections to the stars and planets. Wonderful presentation!" - Suzanne A., Denver, CO
